Ra Mani Kanta Bathula

Software Engineer & Full-Stack Developer

ram.thedevhub@gmail.com · +91 6303589140 · github.com/Ramcodeverse · India · Open to Remote & Hybrid

SUMMARY

Cyber Security graduate and aspiring Backend Developer (Node.js) focused on application security. I have built scalable Node.js and Express services with WebSockets, JWT authentication, RBAC, encrypted storage, and parameterized database access.

Through cybersecurity internships I have run vulnerability assessments with Burp Suite, Nmap, and Wireshark. I like production-ready applications that are reliable, maintainable, and secure by design.

SKILLS

Programming languages: JavaScript, TypeScript, Python, SQL, Bash

Frontend: React, HTML, CSS, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication

Databases: SQLite, Prisma ORM, SQL

Cloud & tools: Google Cloud, AWS, Git, GitHub, Linux, Node.js test runner (node:test)

Cybersecurity: OWASP Top 10, API Security, RBAC, bcrypt, AES-256-GCM, Rate Limiting, Vulnerability Assessment, CVSS, Burp Suite, Nmap, Wireshark

EXPERIENCE

Datavalley India Pvt. Ltd. (APSCHE)

Cybersecurity Intern · Remote | Jan 2026 – Apr 2026

- Performed vulnerability assessments on 15+ web endpoints and local networks using Nmap, Wireshark, and Burp Suite; identified and remediated 12 critical vulnerabilities.
- Remediated OWASP Top 10 vulnerabilities across mock production environments.
- Automated log parsing and port scanning with Python and Bash on Linux, reducing manual audit time by 60%; documented findings with CVSS scoring and remediation recommendations.

Zscaler

Zero Trust Cloud Security Virtual Intern | Jul – Sep 2025

- 10-week internship on Zero Trust architecture, cloud security and advanced threat protection.
- Built working knowledge of Zero Trust design and cloud security best practices.

APSSDC Online

Data Analysis Using Python Intern | May – Jul 2025

- Wrote Python scripts with Pandas and NumPy to clean and validate 100K+ rows of tabular data.
- Automated cleaning, aggregation, and validation workflows, reducing processing runtime by 35%.

Ethical Hacking Institute

Ethical Hacking Virtual Intern | Apr – Jun 2025

- 10-week internship covering ethical-hacking methodology, penetration testing and vulnerability assessment.
- Ran hands-on penetration-testing exercises and full vulnerability assessments.

Palo Alto Networks

Cybersecurity Virtual Intern | Jan – Mar 2025

- 10-week programme on advanced threat analysis, network security and next-generation firewalls.
- Completed advanced training in threat detection and prevention.

EduSkills & APSCHE

UiPath RPA Developer & Ethical Hacking Intern · Long-term | 2024 – 2025

- 240-hour programme combining UiPath RPA development with ethical hacking, organised by EduSkills with APSCHE.
- Built automations in UiPath and practised hands-on ethical hacking.

Bluestock

Software Development Engineer Intern | Oct – Nov 2024

- Full-stack development and system design for fintech applications.
- Engineered frontend components for fintech dashboards and added robust API integrations, improving performance and stability.

UiPath

RPA Developer & Automation Specialist · Hybrid | 2023 – 2024

- Designed robotic process automation and workflow optimisation for enterprise clients.
- Automated 50+ business processes, cut manual effort by 70% and led automation workshops.

TCS (Forage Program)
Full-Stack Development Trainee · Virtual | 2023
- Modern web development, cloud computing and agile practice on real-world enterprise applications.
- Earned an advanced React.js certification and built a scalable microservices architecture.

Mastercard (Forage Program)
Cybersecurity Analyst Trainee · Virtual | 2023
- Threat modelling, incident response and security architecture for financial systems.
- Ran security assessments and drafted incident-response procedures.

JPMorgan Chase (Forage Program)
Software Engineering Trainee · Virtual | 2022
- Fintech development covering trading systems, risk management and high-performance computing.
- Built a real-time trading dashboard and optimised trading algorithms.

PROJECTS

BlinkTalks
Real-time messaging and team workspace platform featuring native WebSockets, presence indicators, typing notifications, and Kanban task boards.
Technologies: React, TypeScript, Node.js, Express, Prisma | github.com/Ramcodeverse/BlinkTalks

MindMate
AI-powered wellness application with mood tracking, journaling, and habit streaks, featuring an admin console and secure Gemini API integration via a server-side proxy.
Technologies: React, TypeScript, Node.js, Express, Gemini API | github.com/Ramcodeverse/MindMate

Nexus TaskFlow
Production-ready full-stack task management platform with real-time collaboration, AI-powered workflow automation, and SaaS-grade architecture.
Technologies: React, Node.js, TypeScript, Firebase, Tailwind CSS | github.com/ramcodeverse/nexus_taskflow

EDUCATION

Cyber Security graduate · Class of 2026

CERTIFICATIONS AND VIRTUAL EXPERIENCES

Google Cloud Certified Associate Cloud Engineer – Google Cloud (Jul 2025)
Google Cloud Engineering Certificate – Google Cloud · Career Launchpad (Foundational)
AWS Academy Graduate – Cloud Architecting – AWS Academy (May 2024)
UiPath Automation Developer Associate Training – UiPath Academy (Apr 2025)
RPA Developer Foundation (v2021.10) – UiPath (2025)
Cybersecurity Fundamentals – Palo Alto Networks (May 2024)
Network Security Fundamentals – Palo Alto Networks (May 2024)
Security Operations Fundamentals – Palo Alto Networks (Sep 2024)
Cloud Security Fundamentals – Palo Alto Networks (May 2024)
RPA Developer Virtual Internship – AICTE · EduSkills · UiPath (Jan – Mar 2025)
Software Engineering Job Simulation – Accenture · Forage (Jun 2025)
Software Engineering Job Simulation – JPMorganChase · Forage (Jun 2025)
Cybersecurity Job Simulation – Mastercard · Forage (Jun 2025)
Cybersecurity Analyst Job Simulation – Tata Consultancy Services · Forage (Jun 2025)
Beginners Guide to Cybersecurity (CS0221EN) – IBM · edX (Nov 2024)
Fundamentals of Java Programming – Board Infinity · Coursera (Nov 2025)
OOPs in Java – Simplilearn SkillUP (Nov 2025)
Java And C++ Complete Course for Beginners – Udemy · Crunch Coding (May 2025)
